Definitions (as outlined by the MSWG):

CROSS-COMMUNITY INTERACTION (XCI) is defined as activities occurring between two (2) or more SO/AC groups.

INTERNAL SO/AC WORK (IW) includes work within one AC or SO (including stakeholder and constituency groups), or one AC or SO group and the Board or members of the Board.

OUTREACH ACTIVITIES are defined as activities conducted by SO/AC groups or cross-community groups with the intention of increasing awareness and interest in ICANN with individuals and organizations outside of the ICANN community.
● These activities are consistent with ICANN's function and mission. In ICANN's global multistakeholder model, policy is developed in a bottom-up fashion, a process that is enhanced and strengthened by reaching out to external communities, educating them about ICANN and encouraging them to participate if they wish.

CAPACITY BUILDING is defined as any learning effort (including education training and tools), and special emphasis on leadership training at Meeting C.
