

An updated IDNA criterion  
for right-to-left scripts

draft-alvestrand-idna-  
bidi-04

14 Feb 2008

Single digit  
plus  
single letter.

Display order depends on  
directionality of  
adjacent labels.

Arabic digit next to  
European digit.

Separators appear in  
different order depending  
on the directionality of  
adjacent labels.

**Either leading digit  
or trailing digit  
but not both,  
unless all adjacent  
labels are identical  
in that regard.**

**Display order of labels.**

**LTR1.LTR2.LTR3**

**3LTR.2LTR.1LTR**

**Cary Karp <ck@nrm.museum>**
